Humans can understand other apes' common methods of sign language, scientists have just discovered. Researchers at the University of St Andrews in Scotland have found that people can comprehend the meaning of signals apes, such as wild chimps and bonobos, use to communicate with each other. The scientists' video-based study asked volunteers to interpret the gestures from clips of various apes and choose from a list of potential translations.

## This week's story looks at events related to ...

# Reflection

Communication is vital for us to work, live and play together. Through our words, actions and facial expressions, we can share both happy and sad times with those around us and help each other when needed.

# Protected aracteristics

Some people may

have a disability,

such as deafness, which

means they communicate

with others in a different

way. This should never

cause someone to

be treated unfairly.

# **Mutual Respect and Tolerance**

We are all different, so communicate in different ways. Developing our communication skills can help us become more understanding of the world we live in and may even help someone else feel welcome and cared for.

There are many languages spoken across the world that people can use to communicate with one another. We all have the right to use our own language, even if this is not shared by most people in the country we live in.

### Useful vocabulary

### Beckoning

Interactions

\*\*\*\*\*\*\*

Beckoning with fingers pointing down.

Communication with or reaction to someone or something.

interactions and relationships with people at home and at school, what are some of the ways that you communicate with each other?

Thinking about our own

#### Comprehend To understand.

Researchers at the University of St Andrews in Scotland have four that people can comprehend the meaning of signals apes, such as wild chimps and bonobos, use to communicate with each other.

Translation Converting one language into another.

The scientists' video-based study asked volunteers to interpret the gestures from clips of various of potential translations

#### Gestures

Movements of part of the body, especially a hand or the head, to express emotion or information. The scientists' video-based study asked volunteers to interpret the **gestures** from clips of various apes and choose from a list of potential translations.

### Vital

Absolutely necessary; essential. ication is vital for us to work, live and play together

Can you use them in your writing this week?
